

Giorgi Khojevanishvili met the local population in KvakhvrelI and listened to their needs

03 October 2018

Giorgi Khojevanishvili continues meetings with the population. This time along with Mayor of the Gori Municipality, he was in the village of KvakhvrelI and met the local inhabitants there. At the meeting the discussion focused on such priority issues as arrangement of outdoor lighting and organization of tourist places. According to the Governor non of the issues will remain unattainable and will be resolved gradually. . The population consider that such meetings and direct communications to the representatives of the government in order to discuss important issues of the village, are significant for them.

The gas transportation company has recently completed the gasification of Kvakhvrli and Uplistsikhe. It is worth mentioning that the internal roads have been amended and gritted within the project. The pits on the passage were a major problem for the population during the movement.

Later on, Giorgi Khojevanishvili visited KvakhvrelI Public School and got familiar with the situation there. „The infrastructural condition must be maximally adjusted at educational institutions, so that students can get education in a full-fledged environment. We will bring into appropriate actions and care within the competencies to solve the issues as fast as possible”,-said Giorgi Khojevanishvili.
