

the Prime Minister of Georgia got familiar with the current project of modernization of “HeidelbergCement” company

16 November 2018

Mamuka Bakhtadze, -the Prime Minister of Georgia with Giorgi Khojevanishvili, -Governor of Shida Kartli and the authorities of the company, got familiar with the current project of modernization of “HeidelbergCement” company in Kaspi. The project of this factory modernization means to build a dry line of Klinker production according to the latest technologies which will considerably limit the expenses of production and increase the effectiveness of energy. The investment cost of the modernization project is \$100 000 000 and it will be completed in spring 2019.
