

Presentation of Frost Buster System was Held with the Farmers of the Region

19 December 2018

The presentation of frost buster systems was held with the farmers of the region in Gori. The Belgian company "Agrofrost" introduced the latest production machine, which minimizes the negative impact on fruit and berry crops. Spring frost greatly damages harvest, timely prevention is needed for reducing risks. The country is actively involved in providing farmers in perfect harvesting process for this purpose. They can benefit from the 40% co-financing program of the Project Management Agency.

The sales manager of the company Arno Clayburgh introduced the system instruction to the gathered in details. The presentation also took place in the orchard where the farmers had an opportunity to see the principals of the machine.

Giorgi Khojevanishvili, Governor in Shida Kartli, the representatives of the Regional Division of the Ministry of Environment Protection and Agriculture in Shida Kartli and the farmers of the region attended the meeting as well.
