

Works of Arranging Water System will Start in Baiantkhevi and Gverdisubani Settlements

26 February 2019

United Water Company starts the new project in Surami Settlement in the Khashuri Municipality. Building works of arrangement water systems is going to start in the nearest future in Baiantkhevi and Gverdisubani settlements. There are no water supplying centralized systems in these villages. Their population is provided with water by a small debate springs on the mountain slopes. The problem of water supplying existing for decades will be solved and about 1200 locals will be satisfied after finishing the project and they will have constant and high quality water supply. The chlorate and reservoir will be built, water supplying main pipeline and network will be arranged, about 400 families will have metering within the project. The project will be funded by 1,115,036 from the state budget. The works will be finished in November,2019.
