

# **Giorgi Khojevanishvili Met Ateni Population and got Familiar to the Issue of Water Supplying**

18 March 2019

Giorgi Khojevanishvili, the State-representative in Shida Kartli together with the representatives of the local self-governance was at the village of Ateni in the Gori Municipality and looked around the suburbs where water supply is underway. He also met with the population and discussed about solving of this issue. First of all, a geological conclusion and researching of the reasons of existing flaw are important at this stage. Therefore, the tender will be announced for project-cost estimate design and the relevant works will be implemented after that. As for the issue of the damaged part of the irrigation system at the village, the tender will be announced in the nearest future for the rehabilitation works.

The rehabilitation of the 12 km section of the Khidistavi-Ateni road is also planned in Ateni this year, as well as the tourist infrastructure will be arranged near Ateni Sioni, which means to have parking places and toilets.
