

Mejvriskhevi-Akhalubani road rehabilitation is intensively underway

11 May 2019

Giorgi Khojevanishvili, -the State Representative of Shida Kartli and his deputy, -Simon Guledani visited the constructing works of Mejvriskhevi-Akhalubani road rehabilitation. More than a million GEL is provided for works and is being implemented by the fund of the projects to be implemented in the region.

2kms of the road is planned to be asphalted, a drainage system, pavements and traffic signs will be installed.

"The improvement of road infrastructure is being carried out with full load in the region. We have already visited the Mejvriskhevi-Akhalubani section, which will be completed this year and the population will be able to use renewed infrastructure. In addition, the arrangement of drinking water system is also planned in the village Mejvriskhevi. Our goal is to improve living conditions for the population in the shortest time"- noted the State Representative.

The Municipal Development Fund of Georgia is planning to arrange a drinking water network and a new reservoir in 11 villages located at the occupation line in Gori municipality.
