

# The car park for cleaning the municipality has been renewed in Gori

05 August 2019

From now on, 6 new special techniques have been put into operation to clean the Gori municipality. 4 solid waste vehicles and 2 street washing vehicles appeared in the town streets in the morning. At the same time, these machines are multifunctional. In addition, street washing machines, with the exception of the water dispenser, have sandblasting equipment, a front shovel and a squeaky brush, which will greatly assist in winter, during heavy rainfall, short-term snow removal, and in the process of spreading the technical salt on the road.

Shida Kartli State Representative - Giorgi Khojevanishvili and Gori Municipality Mayor Konstantine Tavzarashvili inspected the renovated car park. I think it is very important to update the Gori City Hall Cleaning Service to make Gori even more clean and attractive. One of our priorities this year is to promote and develop tourism. An important prerequisite for achieving this goal is a clean town and orderly infrastructure. A refurbished, convenient and multi-functional car park will significantly improve the situation in this regard, "-Shida Kartli State Representative said
