

# Government Officials got Acquainted with the Ongoing Works in Kaspi Municipality

06 December 2019

Vice Premier, the Minister of Regional Development and Infrastructure,-Maia Tskitishvili, Giorgi Khojevanishvili,-Shida Kartli State Representative, Irakli Mezurnishvili,-the Majoritarian MP of Kaspi and the officials of the local government got acquainted with ongoing infrastructural projects in Shida Kartli.

Building of regional innovation centre is ongoing in the town of Kaspi. A two-storied innovative centre is being built due to the project. Besides the techno-park a vocational school is being built on the same area also which will hold 200 students. Trainings, workshops and presentations can be held at the innovation centre in the spaces specially arranged for these activities and everybody will be able to work in the special working spaces. There will be a Maker space which means the space for creative people where anyone can make a prototype of his/her idea or invention with the help of modern high-tech machines. The project is being implemented by the financial supporting of the European Investment Bank (EIB) . The reconstructing started in December, 2018 and will be completed in 2020.

Building of modern schools are ongoing in the villages of Tsinarekhi and Kodistskaro at Kaspi Municipality. The project is being implemented by the fund of Municipality Development. The local teachers and students will benefit from the updated infrastructure starting next autumn.

The officials of the government also looked round a newly rehabilitated football pitch in Kaspi. Kaspi Central Pitch was built by the financial supporting of the Regional and Municipality Development Fund and the Football Federation of Georgia.

Within the framework of the project, a podium and a press lounge for 500 people were arranged on site, a high quality artificial pavement was installed, a lighting system was installed and a sports school building containing administrative and dressing rooms was renovated. The area of the new stadium has one standard size and one mini square.
