

# Road infrastructure works are underway in Gori

08 June 2020

Rehabilitation works in the region continue in an intensive mode. Shida Kartli State Representative Giorgi Khojevanishvili, his First Deputy Simon Guledani, Gori Municipality Mayor Konstantine Tavzarashvili and local self-government representatives inspected the 506-meter rehabilitation works on Chavchavadze Avenue in Gori.

The project is co-financed by a fund to be implemented in the regions and its cost is up to half a million GEL. The project envisages full rehabilitation of the section of the road from Agmashenebeli Avenue to Razmadze Street. The works are scheduled to be completed in July this year.
