

# Assistance of UNO for farmers from Shida Kartli

12 February 2016

The meeting of the representatives of information-consultation service center of farmers was held at regional administration of Shida Kartli, which was attended by deputy governor of Shida Kartli Amiran Shavshishvili, head of Shida Kartli administration of Ministry of Agriculture Mamuka Lomsadze and representatives of UNO Development Fund. UNO Development Fund handed over the newest agricultural literature and small laboratories to information-consultation centers, which will help the farmers to learn about condition of the soil and to determine the diseases of plants. The representatives of consultation centers from Shida Kartli Municipalities attended the meeting as well. The representatives of UNO Development Fund paid their attention to efficiency of the micro laboratories and promised further assistance. I must say the information-consultation centers of farmers of the Ministry of Agriculture work well in the whole country, including Shida Kartli Municipalities, which serves to supply local farmers with consultations and advices in issues of agriculture, as well as to inform the farmers about fulfilled projects.
