

New Medical Hospital opened in Gori

09 December 2016

In Gori, in Verkhvebi Settlement a clinical-diagnostic center of outpatient department type with modern standards was opened. Together with the representative of the local government acting Shida Kartli Governor Ioseb Okromelidze attended the presentation. “The new clinics will give the population an opportunity to get qualified medical assistance, new additional jobs will be created and this is very important for development of Gori and generally the region” – the Governor stated. In the medical center, there will be a laboratory, rooms for X-ray and echoscopy. In the clinics the patients will receive state as well as private insurance service.
